

Streamlining narcotic and supply management

The CubexRx™ system

CubexRx benefits:

- Flexible configuration allows for the management of supplies, pharmacy and controlled substances in a single cabinet
- Controls access to a single item, increasing accountability and accuracy
- Increases inventory turns, keeping expirations at a minimum
- Reduces costs by eliminating excess supplies
- Provides detailed reporting on controlled substance usage, discrepancies and discrepancy resolutions
- Automates the ordering process; orders are transmitted electronically allowing select suppliers to respond with automated shipping notices and pricing updates
- Integrates with third-party practice management software systems; increasing charge capture rates

CubexRx 1000

31 in (W) x 28 in (D) x 79.5 in (H)

485 - 700 lbs

CubexRx 2000

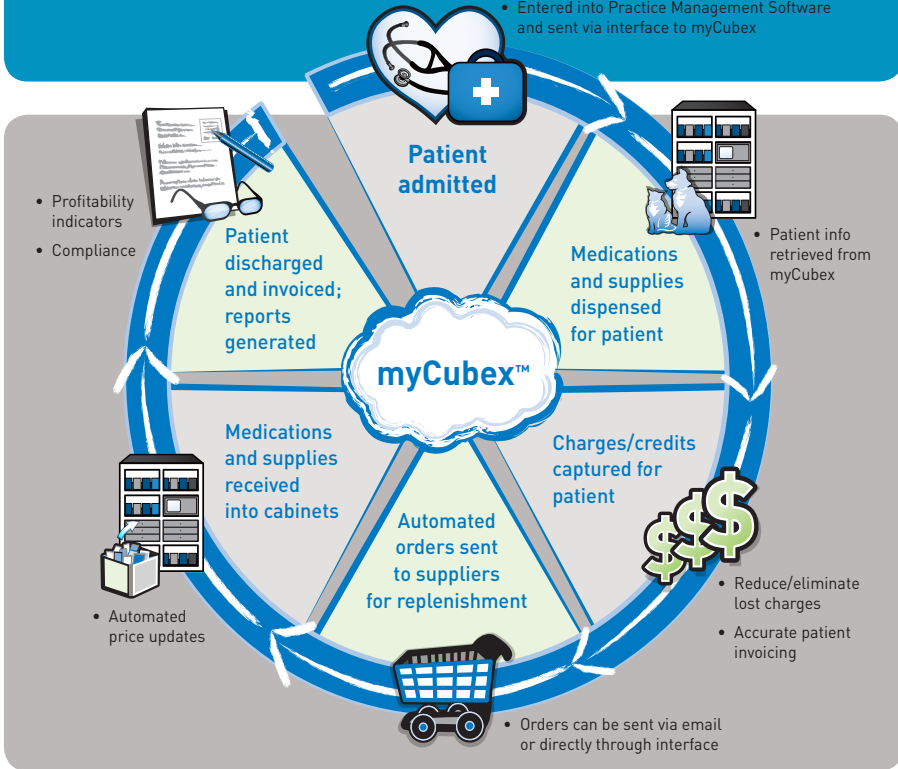

52 in (W) x 28 in (D) x 79.5 in (H)

800 - 1100 lbs
