

The Cubex System

The smart way to manage supplies.

The Cubex System

The smart way to manage supplies.

Managing inventory is a constant challenge affecting all areas of your practice. The Cubex System maximizes efficiency of supply management through proven technology designed to control supply costs while providing automated inventory tracking and replenishment.

Users press the button for the item and inventory levels are tracked.

Cubex maximizes efficiency by:

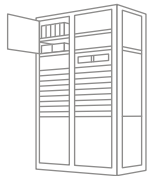

- Reducing costs thru eliminating excess supplies
- Automating manual reorder processes
- Organizing supplies in one centralized location
- Allowing staff more time to focus on patient care
- Eliminating emergency orders and stock-outs
- Tracking costs of supplies by specialty

The Cubex System supply drawers are ideal for storing small items.

How does it work?

The Cubex System provides a secure, centralized location for your supplies. Availability of inventory is increased, allowing staff quick access to supplies needed for patient care.

1. Supplies accessed.

Users press a button when removing supplies. Inventory levels and usage are tracked.

2. Supplies reordered.

Items that reach minimum levels are reordered via the Internet from your suppliers.

3. Supplies delivered.

Your suppliers receive orders from Cubex and deliver the requested items for restocking.

4. System stocked.

Supplies are quickly restocked back to maximum levels by utilizing a restock ID number.

Cabinet Dimensions (in inches)

Cubex™ 1000

(single column)

height: 77.37
width: 26.75
depth: 24.47

Cubex™ 2000

(double column, shown on front)

height: 77.37
width: 51.50
depth: 24.47

Cubex™ 3000

(triple column)

height: 77.37
width: 76.25
depth: 24.47
