

SpecVet Integration

Cubex automates charge capture for specialty veterinary practices

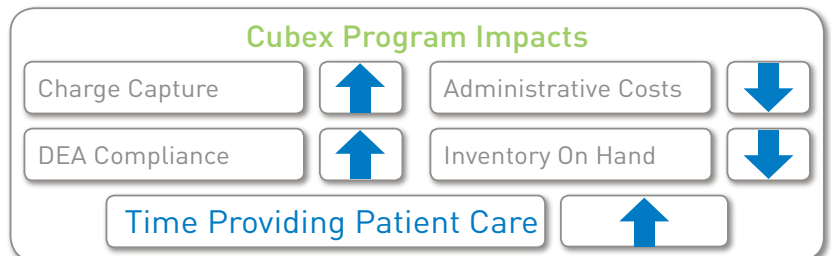

SpecVet Veterinary Practice Software has helped automate almost every part of the specialty and emergency practice, now let us take you the rest of the way... Cubex pharmacy and supply management solutions now seamlessly integrate with SpecVet Veterinary Practice Software, supporting digital inventory tracking through every stage of the patient care process to increase charge capture and improve profitability.

How it works

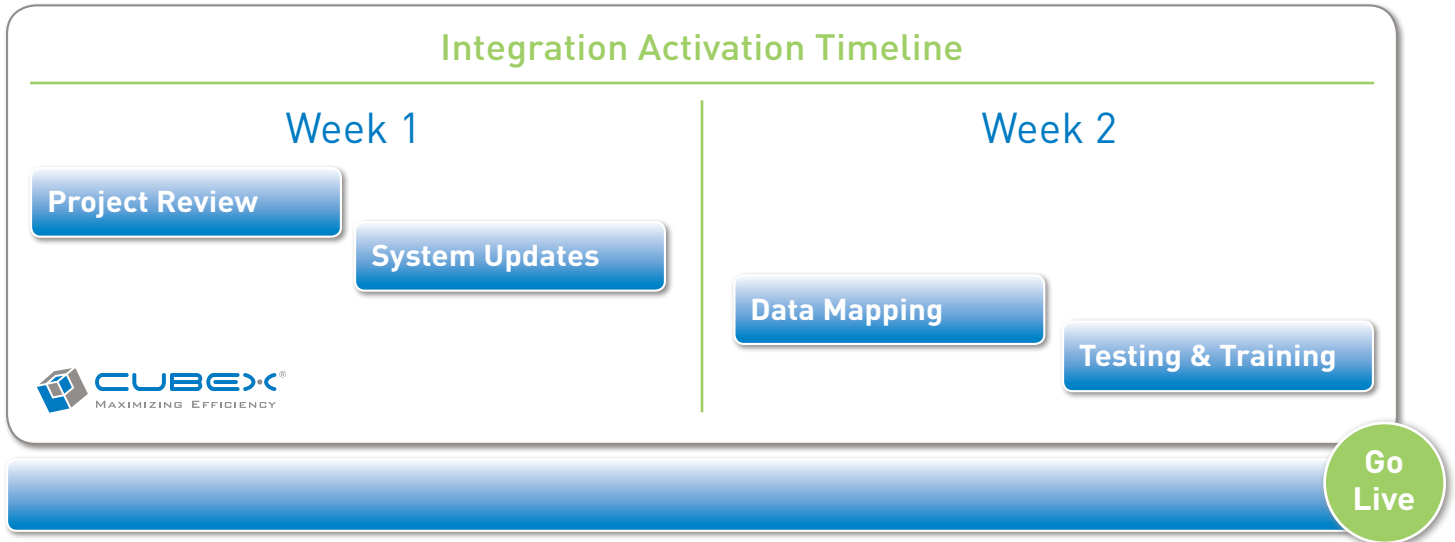

Benefits to Your Practice

The integration of SpecVet and Cubex creates a closed loop system that allows practices to automatically track inventory at every step. This eliminates manual processes allowing more time for patient care while simultaneously improving the profitability of the practice.

Getting Started

Getting started is easy. Cubex implementation specialists evaluate each SpecVet Veterinary Practice Software customer application, tailoring each project to your specific process optimization requirements. Interface activations can be completed in as little as two weeks, with minimal impact to your practice.

System Requirements

System Requirements

Cubex Cabinet Version:
2.0.30 or newer
