FOR IMMEDIATE RELEASE

CAPNA SELECTS CUBEX TO PROVIDE PHARMACY AND SUPPLY SOLUTIONS ACROSS MEMBER FACILITIES

Tempe, AZ (January 18, 2012) – Cubex®, a leading provider of pharmacy and supply management technology to the animal healthcare market, was recently selected by CAPNA, Inc., a member owned group of 19+ veterinary hospitals, to provide solutions to their member practices.

Cubex [www.cubexsystem.com] pharmacy and supply management solutions enable veterinary practices to electronically track inventory at every step of the patient care process. Systems support controlled staff access to pharmacy and supply items, assigning disbursements to patient records, while automatically sending reorders to suppliers. This eliminates overstocking, stock outs and the need to count inventory by hand; reduces data entry errors and missed charges; and helps practices keep just the right amount of inventory on hand.

CAPNA [www.capna.biz] is an affiliation of veterinary practice owners and staff members that are committed to the ideal of continuous improvement in practice. CAPNA practices are independently operated, but benefit from the corporate umbrella that provides operational efficiencies in practice management. CAPNA’s focus is the identification of ‘best medical practices’ through shared learning and collaboration.

“We are excited to have a partner like Cubex helping our member practices identify opportunities to reduce hospital costs, improve productivity, and ultimately increase the profitability of our pharmacy and supply operations,” comments Dr. Dennis Law, President of CAPNA, INC. “Cubex systems will provide CAPNA a level of pharmacy and supply visibility we have not previously had across each of our member hospitals.”

Cubex’s “Preferred Group Program” provides veterinary groups with the capability to implement Cubex solutions in all member hospitals providing hospital-wide visibility to pharmacy and supply inventory. The solutions that Cubex provides enable groups like

CAPNA to run their pharmacy and supply operations as a business within a business, thereby improving overall hospital profitability. Two CAPNA members, University Animal Hospital in Tempe, Arizona and Deer Creek Animal Hospital in Deer Creek, Colorado are long time customers of Cubex and have already experienced both increased staff efficiencies and financial savings from the utilization of Cubex.

“CAPNA’s focus of providing it’s members with tools to increase practice value aligns perfectly with Cubex technology,” comments Anton Visser, President and CEO of Cubex. “Our solution will allow them inventory visibility across all practices enabling them to make better informed business decisions from a corporate level; positively impacting overall profitability of each practice.”

About Cubex®

Cubex® is a global provider of health care products and services that help practices measurably reduce the total cost of ownership associated with pharmacy and supplies. The company develops market-leading technologies including Cubex® automated dispensing systems, Cubex Rx narcotic management stations, QBud wireless access devices, and the myCubex™ web-hosted software and business intelligence applications.
