

# CubexRx™

## Pharmacy Management Solution

Regulatory concerns are at the forefront of your pharmacy business and there is no greater solution than the CubexRx to provide precise accountability and control of narcotics.

Ideal for hospitals that have areas with limited space, the CubexRx offers a flexible, space efficient design and integrates with the myCubex web-based software and all other Cubex products to deliver the full spectrum of pharmacy and supply solutions.

## Benefits

- Enhances regulatory compliance and pharmacy operations
- Controls access to a single item, increasing accuracy and decreasing diversion
- Provides detailed information on discrepancies and resolutions
- Protects against unauthorized access, documents usage by employee
- Integrates with third-party practice management systems and other Cubex products
- Ability to automate the ordering process
- Collects and maintains accurate records to help increase charge capture
- Reduces staff time associated with pharmacy management

# Improving Profitability through Pharmacy and Supply Solutions

## Modular Configuration, Large Capacity

The CubexRx allows for multiple drawer types that accommodate a wide variety of medications and the capability to be secured. Drawer options include high-security, locking 12 and 24 bin single configurations and high-security, locking 6 bin double-deep configurations. A practical system configuration manages 18 items; the maximum system configuration holds 36 items. To offer greater capacity, the CubexRx integrates with Cubex auxiliary cabinets to manage both medications and supplies throughout the facility.

## Improved Regulatory Compliance

With increasing attention being placed on controlled substance usage and tracking, the CubexRx automates the distribution process and provides detailed reporting of all transactions. As medications are removed the following data is tracked:

- Prescribing doctor's information
- Drug name
- Drug strength and dose form
- Quantity dispensed (to the thousandth decimal place)
- Date dispensed
- Patient name
- Owner information

## User-Friendly

The CubexRx incorporates the easy to use, touchscreen Cubex user interface. This allows facilities to maintain a single user-interface amongst all areas with Cubex systems installed. Users simply input their ID and password to gain access. Individual item access and witness capability provides the highest security, improving efficiencies and eliminating errors.

## CubexRx Specifications

Height:	24.5"
Width:	26"
Depth:	23.5"
Total Footprint:	4.25 sq. ft.
Weight:	115 lbs.
(excluding variable drawer weight)
